

DAC Express Windows - Update

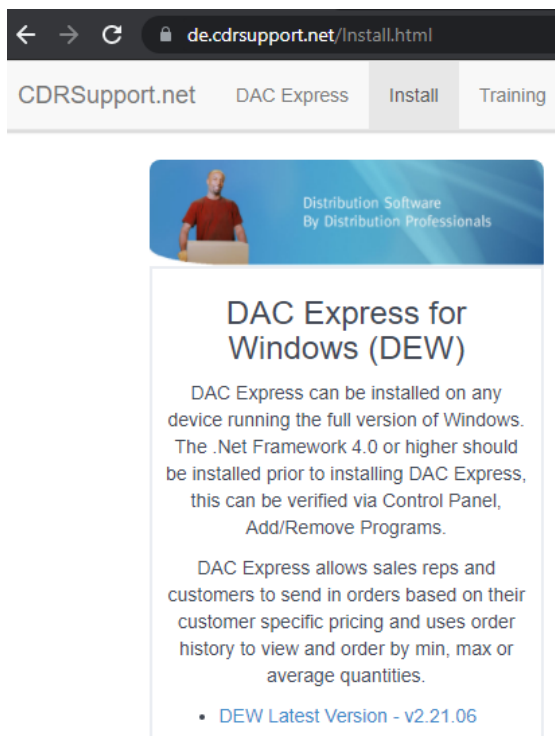

Determine the Current Version

This document explains how to upgrade DAC Express Windows. Verify that the DAC Express icon is on the desktop. There are many versions of DAC Express, to check what version is installed, run it by double-clicking the desktop icon. Then, from the menu, select Help\About.

Determine the Latest Version

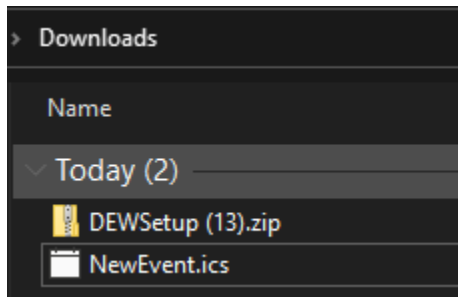

Open a browser and navigate to the DAC Express support site at: <https://de.cdrrsupport.net>. Click on Install from the menu and find the DAC Express for Windows (DEW) section. Find the DEW Latest Version link to see the latest version available (2.21.06) at the time of this writing. **NOTE: if you were told by CDR to download a specific version but the version shown is lower, try a different browser or try to refresh the browser until the version updates. Sometimes browsers use cached data instead of bringing up the latest page.**

DAC Express Windows - Update

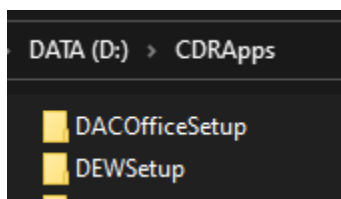

Download the Latest Version

Click on the “DEW Latest Version – v2.21.??” link to initiate the download. By default, this will download the ZIP file to the Downloads folder. Open File Explorer and navigate to the downloads folder.

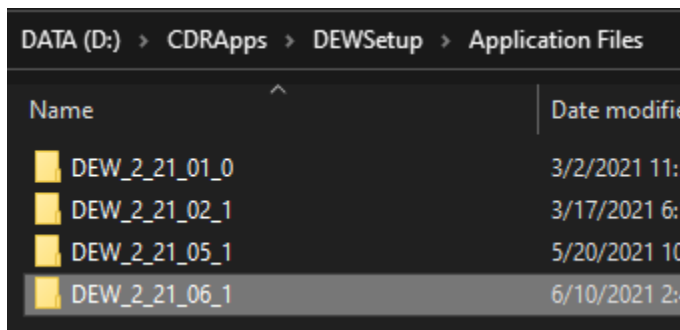

Unzip the File to the CDR Apps Folder

Double-click the ZIP file and select “Extract All”. Browse to the same folder where DAC Express was installed, c:\CDRApps or d:\CDRApps. Click “Replace” when prompted to replace the old installation files. **NOTE: if you do NOT unzip to the same location as when you installed you will get an error and have to uninstall DEW via Add/Remove Programs first.**

Check the Installation Folder (Optional)

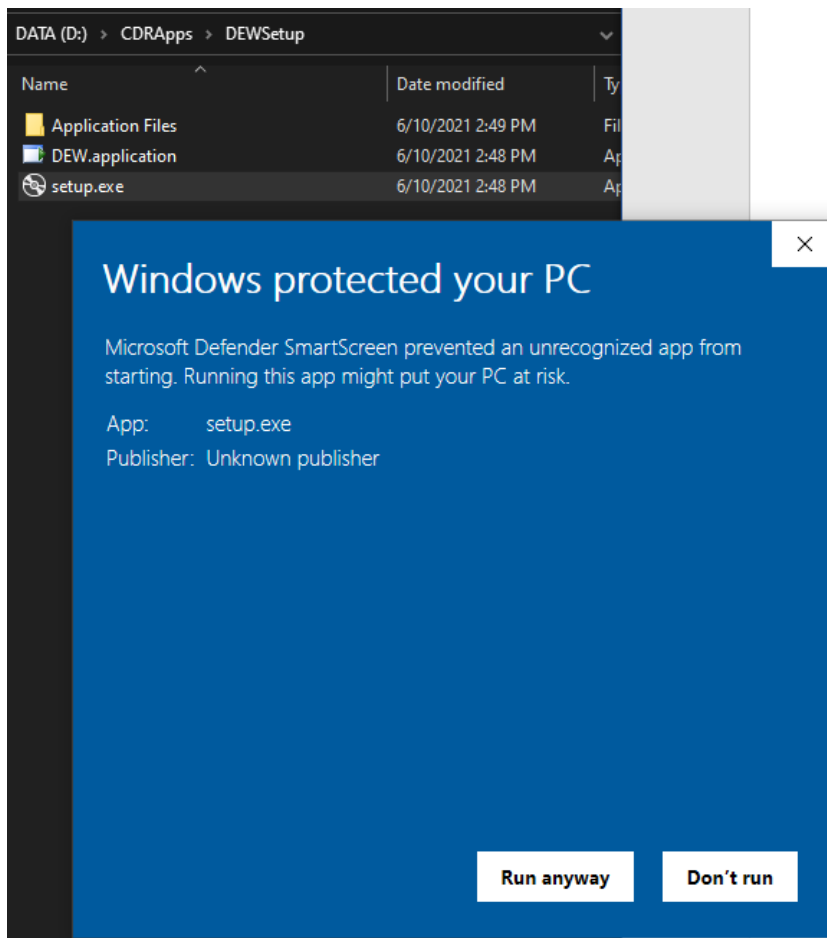

Double-click the DEWSetup folder. Double-click the Application Files folder. Verify that the latest version you just downloaded is in that folder “DEW_2_21_06_1”. Older versions may also be present but as long as you clicked “Replace” when unzipping, the setup.exe will point to the newest folder.

DAC Express Windows - Update

Install the Latest Update

Find the setup.exe file in the CDRApps\DEWSetup folder. Double-click to run it. You may get a warning message “Windows protected your PC”, if so, click the “more info” and then click “Run Anyway”. After the app installs, you may get the same warning again. Click “more info” and “Run Anyway”. Verify the “DEW- DAC Express for Windows Devices” screen displays.

Verify you have the Latest Version Installed

From the menu, select Help>About.
