

The installation procedure starting with DAC Express 2.21.11 has changed. It's now a one-click install. The .NET Framework 4.8 or higher is required to be installed prior to installing DAC Express.

### Do I Need to Uninstall the Prior Version of DAC Express?

No, both versions can remain out there. Once you are comfortable with the new version, the old version should be uninstalled via Windows Settings (Add/Remove Programs).

### How to Check the .NET Framework Version

Check the version installed via Windows Settings (Add/Remove Programs). Search for ".NET" and make sure it is 4.8 or higher.

## Apps & features

### Optional features

### App execution aliases

Search, sort, and filter by drive. If you would like to uninstall or move an app, select it from the list.

### **How to Install DEW**

Open a browser to the <https://de.cdrssoftware.com> site. Click Install from the menu. Click on the "DEW Latest Version - v2.21.11+" link to download the .msi file. Once downloaded, double-click the file to start the installation. Run through the setup screens, accepting the defaults.

### **How to Run DEW**

Once installation is complete, find and double-click the desktop icon "DAC-Express".

### **How to Contact Support**

If you need help, please contact the support team at [Support@CDRSoftware.com](mailto:Support@CDRSoftware.com) to let them know what issues or questions you have.
